Value added course on
**Training course on Flame photometer and
Nephelometer**

Course Coordinator- Ms. Khushbu. B Vyas

Title of the course: "Training course on Flame photometer and Nephelometer"

Title of the Certificate Course: Value added Course on "Training course on Flame photometer and Nephelometer"

Training Period: 6 days x 5 hours

Course Coordinator: Ms. Khushbu. B Vyas

Course Schedule and content

Day 1: Theoretical concepts of flame emission and nephelo - turbidometry. Understanding of techniques of both methods

Day 2: Various interferences and application in FES in various industries and biological field.

Day 3: Design Qualification, Installation qualification, and Calibration of the flame photometer and Nephelometer.

Day 4: Practical training for analysis of samples, Calibration Curve Plot Analysis of various Laboratory samples including limits of Metallic elements, chlorides and sulphates in various pharmaceutical products.

Day 5: Training on analysis of marketed formulations. Self-practice sessions.

Day 6: Interpretation of results, Calculations of concentrations and discussions regarding difficulties occurring during the operation.

Value added course on

**Interpretation and Application of ECG in
Clinical Practice**

Course Coordinator- Mr. Jawed Ali Quazi

Title of Course: "Interpretation and Application of ECG in Clinical Practice."

Title of Certificate Course: Value added course on "Interpretation and Application of ECG in Clinical Practice."

Training Period: 6 days x 5 hours

Course Coordinator: Mr. Jawed Ali Quazi

Course Schedule and content

Day 1: Introduction to Electrocardiogram (ECG) in Clinical Practice.

- Introduction to Cardiac Anatomy and Electrophysiology
- Physics of Electrocardiography
- The Normal ECG

Day 2: Abnormal ECG identification and interpretation

- Identification of normal Depolarization and Repolarization waves in ECG.
- Ventricular Repolarization (T & V waves)
- ST segment Elevation

Day 3: ECG identification and interpretation for type of Arrhythmia

- ECG with Myocardial Infarction (MI)
- ECG without MI
- Premature heartbeats

Day 4: Interpretation for types of Arrhythmia

- Bradycardia
- Supraventricular Tachycardia
- Wide Complex Tachycardia

Day 5: Analyzing and summarizing the interpretation for

- MI
- Arrhythmia
- Flutter
- Enlargement of heart chambers
- Electrolyte imbalance
- Correlation with Medical and Genetic history

Day 6: Knowledge Check of the students with respect to the above topics.

Value added course on
“Research Methods in Health Promotion”

Course Coordinator- Mr. Akash. S. Kapse

Title of Course: "Research Methods in Health Promotion"

Title of certificate course: Value added course in "Research Methods in Health Promotion"

Training Period: 6 days x 5 hours

Course Coordinator: Mr. Akash. S.Kapse

Course Schedule and content:

Day 1: Key steps in health promotion, Key steps in Research

Day 2: Ethical issues in health promotion research

Day 2: Choosing a research Design

Day3: Observational research and Randomized controlled trails

Day 4: Qualitative research strategies and Health promotion measurements

Day 5: Evaluation by statistical Analysis

Day 6: Interpretation and compilation of data for future strategies planning to enhance health promotion.

Value added course on
**“CPR, First Aid, Medical Equipment handling
(Vital Signs)”**

Course Coordinator- Mr. Akash. S.Kapse

Title of Course: "CPR, First Aid, Medical Equipment handling (Vital Signs)"

Title of certificate course: Value Added courses in CPR, First Aid, and Medical Equipment handling (Vital Signs)

Training Period: 6 days x 5 hours

Course Coordinator: Mr. Akash. S.Kapse

Course Schedule and content:

Day 1: Cardio pulmonary resuscitation

- Introduction
- Steps to perform the CPR

Day 2: First Aid treatment in any condition

- Snake bite first aid treatment
- First step in treatment of poisoning
- First aid measures for a road traffic accident victim
- Epilepsy
- Unconsciousness
- Dog bite
- Asthma Attack

Day 3: Medical equipment handling for vital signs

- Thermometer
- Stethoscopes
- Sphygmomanometer
- Pulse Oximetry
- Glucometer
- Penlights
- Weight machine
- Nebulizer
- Sterlizers
- Dialyser
- Catheter
- Otoscope
- Proctoscope
- Suction device
- Ventilator
- Stopwatch

- Tunning fork

Day 4: How to lower blood pressure instantly in an emergency?

Day 5: First Aid treatment for broken bone

Day 6: Treatment for stroke.
